Description

Platform: Safari 15.6

Steps to reproduce:

1. Navigate to https://kasta.ua/uk/
2. Set the language to Ukrainian by pressing the button in the right-up corner.
3. Type in the searching field invalid data with a number value, for example ''штани12'' and press Enter.
4. Page "**За запитом «штани12» нічого не знайдено**" and some of the buttons on the page will turn to another language.

Expected result: Language settings remain the same during the whole session.

Actual result: Some of the buttons on the page will turn to another language when entering invalid data in the search field.
